

LIQUID RING VACUUM PUMP Model AVL 51

PERFORMANCE FEATURES

- Vary port valve design for optimum efficiency across all inlet pressures.
- Near-isothermal compression to safety handle any thermally sensitive and explosive gas.
- Right choice for any wet process.
- [fill TR CU 010/2011 certification.
- [fil TR CU 012/2011 certification.
- Flexibility in motor selection for special and hazardous applications (ATEX).

TÜV IT 19 ATEX 049 AR

NOTES :

The given data are referred to dry air at the temperature of 20°C, at the atmospheric discharge pressure (1013 mbar), and of supply of service water at 15°C temperature. Performances tolerance ±10%.

LIQUID RING VACUUM PUMP

Model AVL 51

APPLICATIONS

- Vacuum industrial processing
- Sterilization
- Extrusion
- Degassing
- Evaporation and distillation
- Priming
- Vacuum sewage
- Bottling
- Depoultry
- Fish farming

FEATURES

AVL 51 is a simple, versatile and reliable liquid ring pump capable to handle almost any gas mixture including vapors in vacuum or overpressure. The operating principle combined to its accurate design allow for severe duty with high tolerance of liquid carry over. The wide range of suction pressure (down to 33 mbar abs) makes the AVL series suitable for many industrial applications including those ones requesting special or ex ex-proof motors. The stainless-steel port plate and impeller are designed and manufactured with accurate process to reach outstanding and steady performance. The low operating speed associated with the robust and simplified construction grant long service life with minimal maintenance. AVL 51 is available in standard version or full stainless-steel AISI 316 (wetted parts). Other material options, on request.
